Stream: Computer Application

CGPA obtained:**9.02**

12th:

Stream: Science

Percentage obtained:**77 %**

10th:

Percentage obtained:**81.12%**

Technical Skills

C-programming, JAVA, Python
HTML, CSS, JavaScript, PHP, SQL
Basics of node.js, react.js, MongoDB

Tools

Git and GitHub, VS Code, Excel,
PowerPoint

Project

Project 1: Skin Disease Prediction System

- Technologies Used: **PHP, HTML, CSS, MySQL**
- Developed a web-based system that predicts skin diseases based on user-input symptoms.
- The application provides possible disease names and basic suggestions for awareness and early consultation.
- Handled front-end development, including user interface design, form creation, and styling using **HTML** and **CSS** for a user-friendly experience.

Project 2: Skill Gap Analyzer

- Technologies Used: **Python, Flask, HTML, CSS, JavaScript, MongoDB**
- Developed an AI-based Skill Gap Analyzer tool to compare resumes with job descriptions.
- Implemented automated skill extraction and skill matching using Python and Flask.
- Integrated **MongoDB** database to store user data and analysis results.
- Built the frontend interface using **HTML, CSS, and JavaScript**.
- Generated a matching score and identified missing skills to help users improve their resumes.
- Implemented an email notification system to send analysis results to users.

Certifications

- Full Stack Web Development
- SQL Essentials Certificate Program
- MERN Stack (currently pursuing)

Internship

- Edureka Institute, Belagavi
- Gained hands-on experience in Full Stack Web Development.
- Worked with both front-end and back-end technologies through practical sessions and guided projects.
- Developed skills in **HTML, CSS, and MYSQL**.
